

Declaration of using generative AI tools (for students)

☒ I/we have used generative AI as an aid/tool (please tick)

☐ I/we have **NOT** used generative AI as an aid/tool (please tick)

If generative AI is permitted in the exam, but you haven't used it in your exam paper, you just need to tick the box stating that you have not used GAI. You don't have to fill in the rest.

List which GAI tools you have used and include the link to the platform (if possible): [Claude (chat version) <https://claude.ai/>, Codex (VS Code extension)]

Describe how generative AI has been used in the exam paper:

1) Purpose (what did you use the tool for?)

Generative AI (Claude) was used as a technical assistant for understanding the flask library and explaining the GitHub project step-by-step guide (<https://github.com/rafaelcgs10/dis2025>).

Additionally, Codex was utilized to analyze our code and help guide our HTML implementation.

2) Work phase (when in the process did you use GAI?)

Generative AI served as a support tool during the planning and implementation phase to resolve and explain specific programming challenges and where the group's technical experience was not sufficient.

3) What did you do with the output? (including any editing of or continued work on the output)

All AI-generated output was subjected to critical and technical evaluation before being integrated into the project. For the HTML implementation, the output served as a starting point that was subsequently edited, such that we could learn as much as possible ourselves.
